

PHELPS ACE HIGH SCHOOL

**BE FUTURE
READY**

ACADEMY OF ENGINEERING

NAF Academy of Engineering at Phelps ACE High School

Invites you to participate in the

5th Annual Shadow Day

March 12, 2020

Invite the next generation to find out what your profession is all about by allowing a student to shadow you for a day!

We invite you to participate in the 5th Annual Shadow Day by volunteering to mentor an Academy of Engineering student for a day on Thursday, March 12, 2020 from 10am-3pm.

Mentors will be matched with one 10th-12th grade student. Multiple volunteer mentors from a single company are welcome and we will match each volunteer with a different student. As a mentor, you will be responsible for showing a student around your work place, including them in the various tasks you do throughout the day and answering questions. We also ask that the volunteers provide lunch for the students.

Volunteer forms are due back by Tuesday, February 18, 2020. Once we have collected the forms, volunteers will be matched with students and additional information will be sent. If you would like to volunteer, please fill out the following form and email it back to the address below.

Phelps ACE High School is one of the specialized high schools in the DC Public Schools. Its Academy of Engineering is part of the National Academy Foundation (NAF) network. For over 30 years, NAF has refined a proven educational model which includes industry-focused curricula, work-based learning experiences and business partner expertise. The NAF Academy of Engineering includes Architecture, Carpentry, Engineering, Electrical, HVAC/R and IT pathways. It aims to provide access to intellectually challenging studies in engineering, mathematics, science and technology. Encouraging more women and underrepresented minorities in STEM fields is an integral part of the program's mission.

The sponsors of the Engineering Shadow Day in conjunction with DC CAN are the Network of Support Partners, a group of experts, parents, former students and organizations who have partnered with the Academy of Engineering to support their goal of recruiting and preparing young people for STEM careers.
